Requirement Number	Description	Contributor name
1	A registration and login form	Augustinas Jučas
3	A list of all goals that have been created.	Augustinas Jučas
2,4,5	A a page for reviewing and editing a single goal. In this page the user can view the details of a single goal, add and review the targets and also edit the goal. In this asignment, we have created two HTML files – one for reviewing a goal and one for editing a goal. But when we will be using JavaScript, we will merge those two pages – when reviewing a goal, the user will be able to press "edit" and all descriptions will turn into textareas, where the user will be able to edit the information on the page. Then, by clicking „save", the information will get saved, and the page will turn back into a review page, with updated information. Also, we support the creation of new goals: once the user creates a new goal, an empty goal is created and the user is redirected to the single goal page, where he can edit the goal. This support will be added via JavaScript, and HTML will (almost) not change.	Justinas Jučas
